

# Study Skills Engineering Process Board

## Ask:

- How can I PROSPER in All Classes?

## Imagine:

- Using the SMART (Specific, Measurable, Achievable, Relevant, and Timely) Goal acronym, students create a quarter report card goal. What do you IMAGINE earning on your report card?
- Students then select a mosaic tile that represents their goals & color them using either warm or cool colors. Each tile is added to the Engineering Process board to create the "I CAN" artwork.

## Plan:

- Each week, Study Skills focuses on adding Study Skills strategies using the acronym PROSPER:
  - Plan & Prioritize (Time Management)
  - Respond Responsibly (Decision Making)
  - Organize (Organizational Strategies)
  - Set SMART Goals (Goal Setting)
  - Prepare to Pass (Study Strategies)
  - Engage in Education (Learning Styles)
  - Read & Record (Note-taking Strategies)

## Create:

- Each week, students earn badges for achieving or mastering PROSPER elements.

## Improve:

- Students reflect on their quarter report card SMART goal:
  - What is working well to achieve that goal?
  - What can be improved moving forward to achieve that goal?
